  - **Headers**:
    - `Content-Type`: `multipart/form-data`
  - **Body**: Form-data
    - `file`: CSV file containing the product data.
- **Response**:
  - **Status**: `202 Accepted`
  - **Body**:
    ```
    {

            "requestId": "unique_request_id"

    }
    ```
  -

Status API

- **Endpoint**: `/status/:requestId`
- **Method**: `GET`
- **Description**: Checks the processing status of the given request ID.
- **Request**:
  - **Headers**:
    - `Content-Type`: `application/json`
  - **Params**:
    - `requestId`: Unique identifier of the request.
- **Response**:
  - **Status**: `200 OK`
  - **Body**:
    ```
    {

            "requestId": "unique_request_id",
            "status": "PENDING","PROCESSING","COMPLETED","FAILED"

    }
    ```

Webhook API

- **Endpoint**: /webhook
- **Method**: POST
- **Description**: Receives notifications from the image processing service about the completion status of image processing tasks.
- **Request**:
    - **Headers**:
        - Content-Type: application/json
    - **Body**:
    ```
    {

        "requestId": "unique_request_id",

        "status": "COMPLETED" // or "FAILED"

    }
    ```

- **Response**:
    - **Status**: 200 OK
    - **Body**:
    ```
    {
        "message": "Webhook received and processed"
    }
    ```
